EXECUTIVE PROTECTION ESSENTIALS

The main difference with SECFOR's training programs comes down to one word, Experience. Our staff has worked protection details in more than 20 countries just in 2019 alone, and will be on detail right up until the August 7-14 Executive Protection Essentials course.

Though our team specializes in High Threat environment protection, our clients are corporate CEOs, A-list entertainers, humanitarian staff and infrastructure clients working on solar projects in the Mexico desert and electric projects in the Middle East. Learn how we do the job from A-Z. See you in training soon!
